

Product Overview

MemeNot AI

by

STARKNOT

Introduction:

/memenot stands as the flagship product of Starknot, marking a significant leap in meme creation and community engagement. As an AI-driven meme tool, MemeNot is designed for Web3 communities, providing them with a seamless way to unleash their creativity.

/memenot fosters community building, interactivity, and facilitates bringing people together. Infinite memes, without leaving Telegram.

Try it today (it's free).

Key Features:

AI-Powered Meme Generation:

`/memenot` harnesses the power of artificial intelligence to facilitate meme creation effortlessly. Through simple commands like `/memenotai`, users can generate memes in chat, streamlining the process and ensuring quality output.

Customization Options:

Beyond basic generation, community members can personalize memes by incorporating their own text, adding a unique touch to each creation. If a user prefers not to utilize AI for their meme, they can simply use the command `/memenot` to receive one random meme from the community's pool. Additionally, users can specify a keyword after the command (`/memenot + keyword`) to retrieve a specific meme from the pool. For those seeking AI-generated memes, the command `/memenotai` will provide a random AI-generated meme, while (`/memenotai + prompt`) generates an AI meme tailored to the desired content specified by the prompt.

Phased Rollout

MemeNot's rollout is structured into phases to ensure smooth and comprehensive user acceptance.

Phase One Exclusive to the Starknot Telegram community, Phase One introduces basic meme functionality. These memes are displayed at random from a curated pool of the community's memes.

Phase Two Unveiling the true potential of MemeNot, Phase Two introduces AI powered meme customization options, allowing users to generate memes based on their own prompts or with randomly generated captions.

Phase Three Expanding beyond Starknot, Phase Three extends MemeNot to other communities with subscription tiers, offering enhanced features and customization options.

Phase Four We are here for the long run. The Starknot team has got more up our sleeves and we will continue to add new features and iterate on MemeNot

MemeNot Pricing & Features

Empower your community and unleash their creativity through AI meme generation, all from within your project's Telegram.

Tiers include:

BASIC

Generate quality memes in chat using your \$TICKER.

PREMIUM

Empower your community with AI meme generation.

PARTNERSHIP

Partner with MemeNot: Premium and exclusive features.

For specific pricing and discounts on subscriptions, refer to the pricing and features section on the website [here](#)

Community Moderation:

MemeNot provides community managers with tools to enable/disable features as needed. Additionally, community members can contribute their own memes, enhancing the variety of available content. Community managers can quickly add community-provided memes to the existing pool by calling /memenotadd within Telegram.

Value Proposition:

MemeNot transcends conventional meme creation tools, serving as a catalyst for enhanced community engagement and creativity, fostering more dynamic and interactive chats. Built specifically for memes, MemeNot distinguishes itself from other AI image generation platforms, empowering users with community-driven bot functionalities to redefine the meme creation experience within the Solana ecosystem and beyond.

Infinite memes, without leaving Telegram.
